

The operating system for modern venues.

Eventbeat replaces the patchwork of spreadsheets, clipboards and disconnected tools with one branded platform — from the first invitation to the last drink. AI does the heavy lifting; your team focuses on the guest.

Why Eventbeat beats the rest

	Eventbeat	Generic event tools
Branding	Every invitation, badge & email = your venue brand.	Vendor-branded templates with limited control.
Check-in	QR scan in <2 sec, 240+ guests/hour, offline-ready.	Manual lists, queues, paper backup.
Matchmaking	AI reads profiles & suggests intros that close deals.	Random seating or no networking layer at all.
F&B + Rooms	Menus, allergens, room plans in the same workspace.	Separate tools, manual sync, duplicate data.
Compliance	Audit-ready exports, shift tracking, GDPR-native.	Excel exports, no audit trail.
Setup	Live in days. White-label included.	Months of onboarding, extra fees for branding.

Numbers that matter

240/h	< 4%	Live	1 stack
Check-ins per hour	No-show rate	AI intros at every event	Replaces 5+ tools

Everything a venue needs. In one place.

Built with operators of premium venues. Every feature solves a real backstage problem — no fluff, no setup theatre.

Branded invitations & e-signature Every invite is a brand moment — custom domain, your fonts, your colours, legally binding e-signature in one click.	Instant QR check-in Offline-ready scanner app. Find any guest in two keystrokes. Real-time headcount for fire-safety and capacity rules.
AI matchmaking Reads bios, intents and history. Suggests intros that turn an event into pipeline. Hosts get a curated guest map, not a name list.	Room & seating planner Drag-and-drop layouts with capacity, dietary and accessibility rules baked in. Share with caterers and security in one link.
F&B and allergen control Menus, allergens, dietary tags and live counts. Kitchen sees exactly what's needed, when it's needed.	Shift-accurate time tracking Staff clock in via QR. Hours, breaks and overtime export to payroll. Audit-ready, GDPR-native.
Brand-safe communications Pre/during/post-event emails and SMS from your domain. No third-party logos, no deliverability surprises.	Analytics that drive bookings Conversion from invite → RSVP → check-in → repeat. Know which formats sell, which guests bring others.

Who it's for

Premium event venues, conference centres, hotels, members' clubs and curated business communities that treat every event as a brand statement and need operations that match.

Want this for your venue?

2–3 weeks to live. White-label included. Investment in equity or revenue share — not invoices.
